Qualifications Framework for German Higher Education Qualifications

(Produced by the German Rectors’ Conference, the Standing Conference of the Ministers of Education and Cultural Affairs of the Länder in the Federal Republic of Germany and the Federal Ministry of Education and Research, and adopted by the Standing Conference on 21 April 2005)
Foreword

The development of a national Qualifications Framework

The aim of the Bologna Process is to create a system of transparent and comparable higher education qualifications. The introduction of a two-tier study structure is an important instrument to this end. There is wide-reaching consensus among the countries who have committed to the Bologna Process as regards the quantitative requirements for Bachelor’s and Master’s degrees (Bachelor’s degree 180-240 ECTS credits, Master’s degree 60-120 ECTS credits), the nomenclature of the two study levels (Bachelor’s and Master’s degrees, or corresponding national designations), and certain fundamental principles (employability, internationalisation, etc.). One challenge for the future shape of the European Higher Education Area is achieving general agreement on the qualifications profiles to be attained for specific degrees, and universally understandable designations (standard terminology).

In the Berlin Communiqué (September 2003) the European education ministers agreed to “elaborate a framework of comparable and compatible qualifications for their higher education systems, which should seek to describe qualifications in terms of workload, level, learning outcomes, competences and profile.” They also undertook to “elaborate an overarching framework of qualifications for the European Higher Education Area”. This European Framework can only define general qualifications. Acceptance of the European Framework will depend on whether it provides added value as regards the desired transparency. It is intended, therefore, to

- bring together the national Qualifications Frameworks, which form the core of the European framework,
- guarantee the transparency of an increasingly diversified higher education system and take account of the need for comprehensibility by students and employers, and
- describe the diversity of qualifications in Europe.

What is a Qualifications Framework?

A Qualifications Framework is a systematic description of the qualifications offered by the education system of a particular country. It incorporates:

- a general description of the qualifications profile of a graduate holding the corresponding degree,
- a list of the desired learning outcomes,
- a description of the competences and skills which the graduate should possess, and
- a description of the formal aspects of a training level (workload in terms of ECTS credits, admission criteria, designation of the degrees, formal entitlements).

Previously German degree programmes were described above all in terms of course contents, admission criteria and duration of study. A Qualifications Framework, however, enables their description in terms of the qualifications which graduates should have acquired once they have successfully completed the degree. This reflects the shift from an input focus to an output focus, and is intended to promote the transparency of the education system.

A Qualifications Framework serves the following goals:

1. Increased transparency, comprehensibility and improved comparability of the degree programmes on offer – both national and international – by
   - clearly setting out the qualification profiles,
   - defining entry and exit points, and overlaps between study and training processes,
   - clarifying alternative educational processes, the relative positioning of qualifications to each other and the possibilities for development in the education system.

2. Improved information for prospective students and employers.

3. Support for evaluation and accreditation
   - by defining reference points.

4. Simpler curriculum development
   - by providing a reference framework which must be completed specific to the subject.

5. Greater comparability of qualifications in the European and the international context.
Explanation of the current draft

The present Qualifications Framework focuses initially on higher education and also describes interfaces with vocational training. Building on this first fundamental classification, in the coming years the Qualifications Framework is to be developed for other sectors of the education system (particularly vocational training and continuing education).

Guidelines

In drawing up the Qualifications Framework particular importance was attached to the following guidelines:

a) Compatibility with a European Qualifications Framework

The debate on a national Qualifications Framework was closely coordinated with the developments at European level and the establishment of other national Qualifications Frameworks. Compatibility with a European Qualifications Framework is a key goal.

b) Subject-independent descriptors

The subject-specific structure of the Qualifications Framework resides in the subjects and higher education institutions. To this end, the Qualifications Framework is to be viewed as a reference framework.

c) Descriptors independent of higher education institution type

The Qualifications Framework does not distinguish fundamentally between **Fachhochschulen** (universities of applied sciences) on the one hand and universities and equivalent higher education institutions on the other. The different educational objectives of these types of higher education institution should not, however, be challenged, but should be harnessed for the development of the new structures.

d) Involvement of all relevant groups

In order to generate broad acceptance for the Qualifications Framework, feedback was sought from all stakeholders concerned (faculty and departmental conferences, students, employers and employees, accreditation agents) right from the development phase.
Explanation of the categories

The division into categories was undertaken in accordance with the Tuning Project, a transnational project which for a number of years has addressed the description of subject-specific qualifications. The Dublin Descriptors, developed by the Joint Quality Initiative, were also employed as an additional reference point. Learning outcomes are included in both of the categories selected here (knowledge and understanding, and ability). The category Knowledge and understanding describes the competences acquired with regard to subject-specific knowledge acquisition (specialist competence). The category Ability covers the competences which enable a graduate to apply knowledge (methodological competence), and to perform a knowledge transfer. Communicative and social competences are also included in this category.
International initiatives

- Joint Quality Initiative (informal network for quality assurance and accreditation of Bachelor’s and Master’s programmes; Austria, Belgium, Denmark, Germany, Ireland, Netherlands, Norway, Spain, Sweden, Switzerland, United Kingdom) => Dublin Descriptors (definition of qualifications to distinguish between Bachelor’s and Master’s programmes)
- European Consortium for Accreditation (ECA)
- Tuning Project 2001 – 2004 => (generic and subject-related competences)
- Bachelor-Master Generic Qualification Initiatives
- EUA Master degrees survey (Andrejs Rauhvargers, Christian Tauch, September 2002)
- NARIC-ENIC Meeting, January 2003, Brussels, on issues relating to recognition of the new qualifications
- Transnational European Evaluation Project (TEEP), 2002-2003, coordinated by ENQA (development of criteria for transnational external evaluation)

Other Qualifications Frameworks

- Danish Qualifications Framework
- Irish Qualifications Framework
- UK Qualifications Framework
- Scottish Credit and Qualifications Framework
Qualifications Framework for German Higher Education Qualifications

*NB: This draft is restricted initially to higher education qualifications. In future it is to be extended to cover the overall school system and the vocational training and lifelong learning sectors.*

<td>Degree levels</td>
<td>Higher education degrees and <em>Staatsexamina</em> (State examinations)</td>
</tr>
</tbody>
</table>

1. **1st level: Bachelor’s level**
   - Degrees at Bachelor’s level:
     - 3, 3.5 or 4 years’ full-time study or 180, 210 or 240 ECTS credits;
     - All degrees qualify graduates to apply for Master’s degrees
   - Qualifications: B. A.; B. Sc.; B. Eng.; B.F.A., B. Mus, LLB

2. **2nd level: Master’s level**
   - Degrees at Master’s level:
     - normally 5 years’ full-time study or 300 ECTS credits;
       - in multi-cycle degree programmes 1, 1.5 or 2 years or 60, 90 or 120 ECTS credits at Master's level;
     - Types of Master’s degrees: more practice-oriented, more research-oriented, artistic profile, teaching career profile;
     - all degrees qualify graduates to apply for a doctorate

3. **3rd level: Doctoral level**
   - (Degrees generally build on a Master’s-level degree, i.e. 300 ECTS credits or more)
   - Qualifications: Dr., Ph.D.

---

1. See list in Annex 1. *Staatsprüfungen* [State examinations] are as a rule assigned to the second level of study; however the following special rules apply: degree programmes leading to a *Staatsprüfung* cover a standard study period of 3 years (primary school or primary level and lower secondary level teaching careers, which may be assigned to the 1st level of study) to 6.5 years (medicine); this is equivalent to 180 - 390 ECTS credits.

2. For artistic degree programmes at *Kunst- und Musikhochschulen* (Universities of Art/Music) this entitlement applies only under certain conditions.

3. The degree designations for non-consecutive Master’s and Master’s programmes which are designed for continuing education are not prescribed and are not limited to the given degree designations, e.g. MBA.

4. Particularly qualified holders of a Bachelor’s degree or a *Diplom (FH)* degree [*Diplom degree awarded by a university of applied sciences*] may also be admitted directly to doctoral studies.
## Level 1: Bachelor’s level (180, 210 or 240 ECTS)

| Master’s graduates have a proven level of knowledge and understanding that normally builds on the Bachelor’s level and significantly consolidates or extends this. They are able to define and interpret the special features, limits, terminologies and schools of thought in their field of learning. | Instrumental competence:  
- They can also apply their knowledge and understanding as well as their problem-solving skills to new and unfamiliar situations that lie in a broad or multidisciplinary context relating to their academic subject. | For degree programmes leading to a first degree (Diplom, Magister, Staatsexamen):  
- higher education entrance qualification  
- in accordance with the regulations of the Länder on admission to higher education for vocationally qualified applicants without a higher education entrance qualification |
| **Consolidating knowledge:** | Systemic competences:  
- They can integrate knowledge and handle complexity;  
- They can make scientifically-founded decisions and draw conclusions, also on the basis of incomplete or limited information, and in so doing can consider social, scientific and ethical insights that also derive from the application of their knowledge and their decisions;  
- They can independently acquire new knowledge and ability;  
- They can carry out independent scientific or applied research projects in a largely self-directed and/or autonomous manner. | For Master’s level: first higher education qualification providing qualification for a profession at not less than Bachelor’s level, plus additional admission requirements to be laid down by the higher education institution |

</tbody>
</table>
Overview:  Staatsexamen [State examinations]

- Primary school or primary level teaching careers (6-7 semesters)
- General teaching careers at primary level and at all or individual lower secondary level school types (7-9 semesters)
- Teaching careers at all or individual lower secondary level school types (7-9 semesters)
- Upper secondary level (general education subjects) or Gymnasium teaching careers (9 semesters)
- Upper secondary level (vocational subjects) or vocational school teaching careers (9 semesters)
- Special educational teaching careers (8-9 semesters)
- Law (9 semesters)
- Medicine (13 semesters)
- Dentistry (11 semesters)
- Veterinary medicine (11 semesters)
- Pharmacy (8 (-9) semesters)
- Food chemistry ((8-) 9 semesters)
Overview: Higher education entrance qualifications

- *Allgemeine Hochschulreife* [general higher education entrance qualification]

- *Fachgebundene Hochschulreife* [qualification entitling holder to study particular subjects at a higher education institution]

- *Fachhochschulreife* [qualification entitling holder to study at a *Fachhochschule* (a university of applied sciences)] (can be for a particular subject or degree programme)

- Land-law regulated options for admission to higher education for vocationally qualified applicants without a higher education entrance qualification
